

Mounds Lake Project

Isn't the reservoir Anderson's only hope?

Anderson, as well as the other communities involved, best hope is in the people of the community. The teachers and the preachers. The visionary and the laborer. We live here and work here. Together, regardless of the Mounds Lake project, the impacted communities will do more than survive, we will thrive!

Would the reservoir guarantee an increase in recreational opportunities and tourism?

Quality of life and careful long term planning has been a focus from the early days of the proposed project. New trails, art and cultural opportunities and public access in all four communities is a high priority to all stakeholders and is a core value to the Mounds Lake project.
