

Chesterfield - Navigate the Future.

▶ FEASIBILITY

Our focus is to go through each step carefully to assure the project is feasible and planned well.

▶ FINANCING

Beyond water revenues from selling water, we will be looking for Federal and State grants. To be clear, no local tax dollars or local fee would be used to finance the project.

▶ SUSTAINABILITY

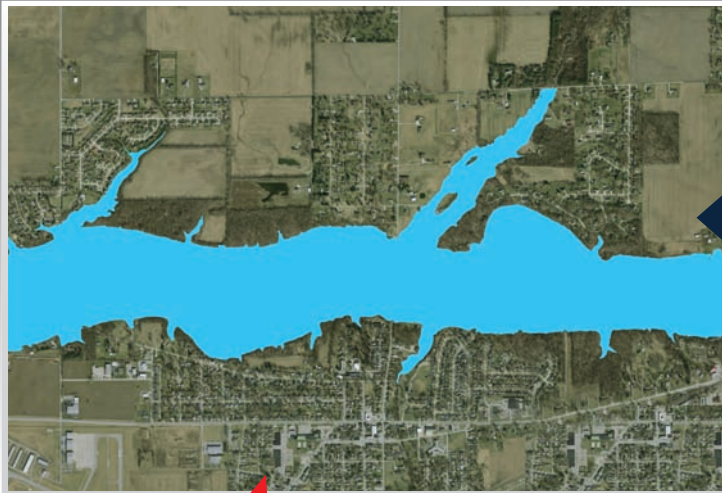

Mounds Lake will provide water to Central Indiana that will mitigate drought and flood impact and allow the entire region to grow economically for decades to come.

▶ SMART WATER

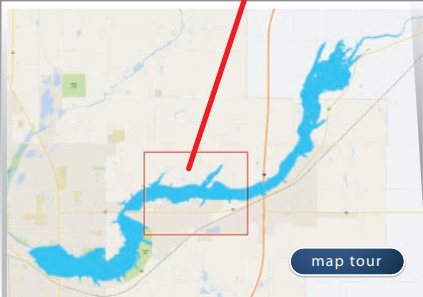

A "smart water" option will enable Mounds Lake to feed Morse and Geist to maximize the water levels in all three of the reservoirs.

▶ VIEWPOINT

It's not what we are accustomed to thinking, but Mounds Lake meets the needs of today & supports with confidence the future growth of our region for generations to come.

- 2100 acres of water surface
- Cost estimated around \$400 million
- Encouraged public participation
- **Chesterfield, Indiana**
- No local tax dollars will be used
- Protection of the historic Mounds
- Connecting trails around lake
- Earliest completion date is 2021

The lake will have the capacity to provide up to **60 MILLION GALLONS** of water daily to Central Indiana.
